Decision Tree (Debug String with Feature Names)

Features: num_courses, num_homeworks, num_changes (scaled) | Label: high_performer

Label mapping: prediction 1 = High Performer, 0 = Low Performer

```
DecisionTreeClassificationModel: uid=DecisionTreeClassifier_4094a7d7d357, depth=3, numNodes=7, numClasses=2, numFeatures=3
  If (feature num_courses <= 0.6272389678906177)
   If (feature num_courses <= -0.5488340969042907)
    If (feature num_changes <= -0.7219463052483135)
     Predict: 0.0
    Else (feature num_changes > -0.7219463052483135)
     Predict: 1.0
   Else (feature num_courses > -0.5488340969042907)
    Predict: 1.0
  Else (feature num_courses > 0.6272389678906177)
   Predict: 0.0
```

Explains split logic with feature names for auditability.
